

Sensor Heads, Separate display type Pressure sensor and Vacuum Switch

Small Pressure Sensor 11-series

Sensor Heads

- *Small-sized pressure sensor head. Width: 10mm, Height: 10mm, Length: 24.5mm*
- *“Union” , “Nipple” , and “Male screw” are available.*
- *Use of an analog output type and display (SED30-series) has made a separate display system possible.*
- *Our small-sized pressure sensors can handle “positive pressure” , “negative pressure” , and “Compound pressure” . Switch output, a total of six different specifications are available.*

Display (31 mm)

- *High level of visibility with its the large-sized LED display.*
- *All settings can be done using just three push buttons.*
- *11 different types of indication units are available.*
- *Two different kinds of output methods are offered- analog output or switch output.*
- *Various types of installation: in the rear, on a flat surface, panel buried, and protection of display.*
 - *Energy-saving by non-display mode.*
 - *Data saving by Panel Lock.*

 *Copper alloy free material and against low ozone concentration on the air flow path*

————— Metal parts material is non-copper metals. HNBR for seal rubber material.
