## 022 LW Series Switches \& Pilot Lights

## Light touch mechanism designed to reduce strain injuries Endures repetitive operation suitable for food processing and packaging industries

- Light touch
- Collective mounting is possible.
- Locking lever removable contact blocks enables easy installation even when mounted collectively.
- Gold plated silver or silver contacts.
- Degree of protection: IP65 (IEC 60529) (except buzzer)
- UL recognized and CSA certified. EN compliant.
(except buzzers)

## 

- See website for details on approvals and standards.

First in the industry! Six different colors with a single LED (LSRD)
Previously, 5 different color LEDs were required but with the new illuminated unit, only a single LED is used.
Only the lens needs to be replaced to change the illumination color. The new LED reduces maintenance time, makes stock control easier, and is enviromentally friendly.

High visibility with new LED (LSRD)
Brighter and clearer compared to conventional LEDS

## Specifications and Ratings

## Contact Ratings

Gold Contact

| Rated Insulation Voltage | 250 V |  |
| :--- | :--- | :--- |
| Thermal Current | 3 A |  |
| Operating Voltage | 125 V AC | 30 V DC |
| Operating Current <br> (resistive load) | 0.1 A | 0.1 A |
| Contact Material | Gold plated silver |  |

Minimum applicable load (reference value): 5 V AC/DC, 1 mA (Applicable range is subject to the operating condition and load.)
Silver Contact

| Rated Insulation Voltage |  |  | 250V |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Rated Operating Voltage |  |  | 30 V | 125 V | 250 V |
| Rated Operating Current | AC $50 / 60 \mathrm{~Hz}$ | Resistive load | - | 3A | 2A |
|  |  | Inductive load | - | 2A | 1.5A |
|  | DC | Resistive load | 2 A | 0.4A | - |
|  |  | Inductive load | 1A | 0.2A | - |
| Rated Thermal Current |  |  | 5A |  |  |
| Contact Material |  |  | Silver |  |  |

- $A C$ inductive load: $P F=0.6$ to $0.7 \quad D C$ inductive load: $L / R=7 \mathrm{~ms}$ max.

## LED Lamp Ratings

## LSRD

- Only one color is available for LSRD so there are no codes to specify the color in the part no.

LSTD Series discontinued on 30/6/2022

| Part No. |  | LSTD-6² | LSTD-1² | LSTD-2 |
| :---: | :---: | :---: | :---: | :---: |
| Lamp Base |  | BA9S/13 |  |  |
| Rated Voltage |  | 6V AC/DC | 12V AC/DC | 24V AC/DC |
| Voltage Range |  | 6 V AC/DC $\pm 10 \%$ | 12 V AC/DC $\pm 10 \%$ | 24 V AC/DC $\pm 10 \%$ |
| Current Draw | AC | $8 \mathrm{~mA}(\mathrm{~A}, \mathrm{G}, \mathrm{PW}, \mathrm{R}), 7 \mathrm{~mA}(\mathrm{~S})$ | 11 mA (A, G, PW, R), $9 \mathrm{~mA} \mathrm{(S)}$ | 11 mA (A, G, PW, R), 9 mA (S) |
|  | DC | $7 \mathrm{~mA}(\mathrm{~A}, \mathrm{R}), 5.5 \mathrm{~mA}(\mathrm{G}, \mathrm{PW}), 4.5 \mathrm{~mA}(\mathrm{~S})$ | $10 \mathrm{~mA}(\mathrm{~A}, \mathrm{G}, \mathrm{PW}, \mathrm{R}), 8 \mathrm{~mA}(\mathrm{~S})$ | 10 mA (A, G, PW, R), 8 mA (S) |
| Color Code (2) |  | A (amber), G (green), PW (pure white), R (red), S (blue) |  |  |
| Lamp Base Color |  | Same as illumination color |  |  |
| Voltage Marking |  | Die stamped on the base |  |  |
| Life (reference value) |  | Approx. 50,000 hours (The luminance is reduced to 50\% the initial intensity when used on complete DC.) |  |  |
| Internal Circuit |  |  |  |  |

## Mounting Hole Layout

Note: Determine the mounting centers to ensure easy operation.

- ø30mm Mushroom: Vertical: 32 mm minimum Horizontal: 32 mm minimum
- Solder/Tab Terminal

Without terminal cover: Vertical: 26 mm minimum Horizontal: 26 mm minimum
With terminal cover:

- Screw terminal:
- PC board terminal:

- Specify button color code in place of (1). B: black, G: green, R: red, S: blue, W: white, Y: yellow
- Specify lens color code in place of (2). A: amber, G: green, R: red, S: blue, W: white, Y: yellow

Black lens consists of a clear lens and a black marking plate. (Without CCC marking)

- Lens style buttons can be used with legend markings. For details on marking plate and film, see page 27.

Dimensions

Bottom View

## PC Board Drilling Layout (Bottom View)

Pay attention to the pattern of the PC board as the terminals on the mounting surface are 2.8 mm wide.

## Applicable Crimping Terminal

Terminal Arrangement (Bottom View)
Solder/Tab Terminal

Note: SPDT has C, NO, and NC only in the center. DPDT has C, NO, and NC only on the right and left. Screw terminal type is DPDT.

Screw Terminal (DPDT only)

Color Code and Operating Voltage Code

| (2) Color Code | (3) Operating Voltage Code |
| :--- | :--- |
| Specify a color code in place of (2). | Specify an operating voltage code in place |
| A: amber | of (3. |
| G: green | $2: 6 \mathrm{~V} \mathrm{AC/DC}$ |
| PW: pure white | $3: 12 \mathrm{~V} \mathrm{AC/DC}$ |
| R: red | $4: 24 \mathrm{~V} \mathrm{AC/DC}$ |
| S: blue |  |

- Every illuminated selector switch contains an LED lamp (LSTD) of the specified color and voltage.

## Dimensions

[^4]
## Buzzers

## Continuous / intermittent (long) / intermittent (short) sounds can be selected with a built-in slide switch

- Collective mounting possible.
- Separate type with locking lever, easy installation even when mounted collectively.
- Round and square types available.
- Solder/tab and PC board terminal types available.
- Single board mounting possible.
- Equipped with an LED indicator which lights (steady)/ flashes with the buzzer sound.

## Specifications

| Insulation Voltage | 60V AC/DC |
| :---: | :---: |
| Operating Voltage | $6 \mathrm{~V}, 12$ to 24 V AC/DC $\pm 10 \%$ |
| Current Draw | DC: $7 \mathrm{~mA}, \mathrm{AC}: 20 \mathrm{~mA}$ |
| Sound Pressure (at 0.1 m ) | Steady sound: 80 dB minimum (at the rated voltage) |
| Sound Frequency | $2 \mathrm{kHz} \pm 500 \mathrm{~Hz}$ |
| Flickering Cycle | Slow intermittent sound: 55 cycles per minute $\pm 10 \%$ Quick intermittent sound: 600 cycles per minute $\pm 10 \%$ |
| Operating Temperature | -20 to $+55^{\circ} \mathrm{C}$ (no freezing) |
| Storage Temperature | -25 to $+80^{\circ} \mathrm{C}$ (no freezing) |
| Operating Humidity | 45 to 85\% RH (no condensation) |
| Insulation Resistance | $100 \mathrm{M} \Omega$ minimum (500V DC megger) |
| Dielectric Strength | Between live and metal parts: 1,000V AC, 1 minute |
| Vibration Resistance | Operating extremes, Damage limits: 5 to 55 Hz , amplitude 0.5 mm |
| Shock Resistance | Damage limits: $1,000 \mathrm{~m} / \mathrm{s}^{2}$ |
| Life | 1,000 hours minimum |
| Degree of Protection | IP40 |

## Safety Precautions

- Turn off the power to the LW series before starting installation, removal, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid burning your hand, use the lamp holder tool when replacing lamps.
- For wiring, use wires of a proper size to meet the voltage and current requirements. Solder correctly according to the instructions on "Wiring" and "Notes on Terminal Cover" on page 28. Tighten the M3 terminal screws to a torque of 0.6 to $1.0 \mathrm{~N} \cdot \mathrm{~m}$. Failure to tighten terminal screws may cause overheating and fire.

## Instructions

## Panel Mounting

Remove the contact block from the operator. Insert the operator into the panel cut-out from the front, then install the contact block.

## Removing the Contact Block

Turn the locking lever on the contact block in the direction opposite to the arrow on the housing. Then the contact can be removed.
Installing the Contact Block Insert the contact block, with the TOP markings on the contact block and the operator placed in the same direction. Then lock the units, turning the locking lever in the direction of the arrow.

## Notes on Mounting

Use the optional ring wrench (LW9Z-T1) to mount the operator onto the panel. Tightening torque should not exceed $1.2 \mathrm{~N} \cdot \mathrm{~m}$. Do not use pliers. Excessive tightening will damage the locking ring.

## Collective Mounting

As the locking lever can be turned easily from the rear of the units using a screwdriver, the contact blocks can be removed even when mounted collectively.

## Replacement of Lens and Marking Plate

## Removing

1. Remove the operator (lens, marking plate, and lens holder) by inserting a screwdriver into the recess of the lens through the bezel.
[Removing the Operator]

2. Remove the marking plate by pushing the lens from the rear to disengage the latches between the lens and the lens holder, using the screwdriver as shown below.
[Removing the lens]

Note: The translucent filter in the lens holder cannot be removed because the filter is sealed to make the unit waterproof.

## Installing

For round lens, place the marking plate on the lens holder with the anti-rotation projection engaged and press the lens onto the lens holder to engage the latches. For square lens, insert the marking plate into the lens, and press the lens onto the holder to engage the latches.
Note: Make sure of correct orientation of the marking plate.
[Round Lens]

[Square Lens]

## Marking Plate and Films

For LW series illuminated pushbuttons and pilot lights, legends and symbols can be engraved on the marking plates, or printed marking film can be inserted under the lens for labelling purposes.
Marking Plate and Marking Film Size

| Lens | Round Lens ${ }^{\text {R }}$ Square Lens |
| :---: | :---: |
|  | - Engraving must be made on the engraving area within 0.5 mm deep. <br> - The marking plate is made of white acrylic resin. |
|  | - Two 0.1 mm -thick films or one 0.2 mm -thick film can be installed in the lens. <br> - Marking film is not included. <br> - Recommended marking film: Polyester film |

## Instructions

Insertion Order of Marking Plate and Film
[Round Lens]

Note: Film is not included
[Square Lens]

Note: Film is not included Make sure of correct orientation of the marking plate.

## Replacement of Lamps

Lamps can be replaced using the lamp holder tool (OR-55) from the front of the panel, or by removing the contact block from the operator.

## How to Remove

To remove, slip the lamp holder tool onto the lamp head. Then push slightly, and turn the lamp holder tool counterclockwise.

Lamp Holder Tool
OR-55

## How to Install

1. To install, insert the lamp head into the lamp holder tool, and hold the lamp as shown in the figure below.

2. Insert the pins on the lamp base into the grooves in the lamp socket. Insert the lamp and turn it clockwise.

## Wiring

1. Solder the terminals within 20W/5 sec or $260^{\circ} \mathrm{C} / 3 \mathrm{sec}$ without exerting external force to the terminals. While soldering, do not touch the soldering iron to the housing. While wiring, prevent tension from being applied to the terminals. Do not bend or raise the terminals, nor exert excessive force to terminals.
2. Use non-corrosive liquid flux.
3. For tab terminals, Positive Lock Connectors and Easy Lock Connectors can be used.
4. Tighten the terminal screw of the screw terminal type to a torque of 0.6 to $1.0 \mathrm{~N} \cdot \mathrm{~m}$.

## Notes on Terminal Cover

[Solder/Tab Terminal]
Insert the terminal cover into the contact block with the TOP markings on the contact block and the terminal cover in the same direction.
Note: When wiring, insert the lead wires into the terminal cover holes before soldering.

## Notes on Wiring

When installing a terminal cover onto the solder/tab terminal contact block, solder the inside of lamp terminal (toward the switch terminals) and wire.

## [Screw Terminal]

Terminal cover must be installed on the LW series before wiring.
Note 1: After wiring, terminal covers cannot be installed.
Note 2: When terminal covers are installed, do not use round crimping terminals.
(Wire the terminal by using fork terminals or lead wires directly.

## Single Board Mounting

Mounting the LW series unit on a single PC board offers the following features.

1. Reduced installation labor, easy wiring, space saving, and standardiztion.
2. Since the contact blocks on the PC board can be removed easily using a locking lever, LW series is easy to maintain.
3. Because the LW series requires no studs for fastening the unit to a PC board, special preparation of operation panel is not needed.
4. For details on single board mounting, contact IDEC.

Thank you for using IDEC Products.
By purchasing products listed in our catalogs, datasheets, and the like (hereinafter referred to as "Catalogs") you agree to be bound by these terms and conditions. Please read and agree to the terms and conditions before placing your order.

## 1. Notes on contents of Catalogs

(1) Rated values, performance values, and specification values of IDEC products listed in this Catalog are values acquired under respective conditions in independent testing, and do not guarantee values gained in combined conditions.
Also, durability varies depending on the usage environment and usage conditions.
(2) Reference data and reference values listed in Catalogs are for reference purposes only, and do not guarantee that the product will always operate appropriately in that range.
(3) The specifications / appearance and accessories of IDEC products listed in Catalogs are subject to change or termination of sales without notice, for improvement or other reasons.
(4) The content of Catalogs is subject to change without notice.

## 2. Note on applications

(1) If using IDEC products in combination with other products, confirm the applicable laws / regulations and standards.
Also, confirm that IDEC products are compatible with your systems, machines, devices, and the like by using under the actual conditions. IDEC shall bear no liability whatsoever regarding the compatibility with IDEC products.
(2) The usage examples and application examples listed in Catalogs are for reference purposes only. Therefore, when introducing a product, confirm the performance and safety of the instruments, devices, and the like before use. Furthermore, regarding these examples, IDEC does not grant license to use IDEC products to you, and IDEC offers no warranties regarding the ownership of intellectual property rights or non-infringement upon the intellectual property rights of third parties.
(3) When using IDEC products, be cautious when implementing the following. i. Use of IDEC products with sufficient allowance for rating and performance
ii. Safety design, including redundant design and malfunction prevention design that prevents other danger and damage even in the event that an IDEC product fails
iii. Wiring and installation that ensures the IDEC product used in your system, machine, device, or the like can perform and function according to its specifications
(4) Continuing to use an IDEC product even after the performance has deteriorated can result in abnormal heat, smoke, fires, and the like due to insulation deterioration or the like. Perform periodic maintenance for IDEC products and the systems, machines, devices, and the like in which they are used.
(5) IDEC products are developed and manufactured as general-purpose products for general industrial products. They are not intended for use in the following applications, and in the event that you use an IDEC product for these applications, unless otherwise agreed upon between you and IDEC, IDEC shall provide no guarantees whatsoever regarding IDEC products.
i. Use in applications that require a high degree of safety, including nuclear power control equipment, transportation equipment (railroads / airplanes / ships / vehicles / vehicle instruments, etc.), equipment for use in outer space, elevating equipment, medical instruments, safety devices, or any other equipment, instruments, or the like that could endanger life or human health
ii. Use in applications that require a high degree of reliability, such as provision systems for gas / waterworks / electricity, etc., systems that operate continuously for 24 hours, and settlement systems
iii. Use in applications where the product may be handled or used deviating from the specifications or conditions / environment listed in the Catalogs, such as equipment used outdoors or applications in environments subject to chemical pollution or electromagnetic interference If you would like to use IDEC products in the above applications, be sure to consult with an IDEC sales representative.

## 3. Inspections

We ask that you implement inspections for IDEC products you purchase without delay, as well as thoroughly keep in mind management/maintenance regarding handling of the product before and during the inspection.

## 4. Warranty

(1) Warranty period

The warranty period for IDEC products shall be one (1) year after purchase or delivery to the specified location. However, this shall not apply in cases where there is a different specification in the Catalogs or there is another agreement in place between you and IDEC.
(2) Warranty scope

Should a failure occur in an IDEC product during the above warranty period for reasons attributable to IDEC, then IDEC shall replace or repair that product, free of charge, at the purchase location / delivery location of the product, or an IDEC service base. However, failures caused by the following reasons shall be deemed outside the scope of this warranty.
i. The product was handled or used deviating from the conditions / environment listed in the Catalogs
ii. The failure was caused by reasons other than an IDEC product
iii. Modification or repair was performed by a party other than IDEC
iv. The failure was caused by a software program of a party other than IDEC
v. The product was used outside of its original purpose
vi. Replacement of maintenance parts, installation of accessories, or the like was not performed properly in accordance with the user's manual and Catalogs
vii. The failure could not have been predicted with the scientific and technical standards at the time when the product was shipped from IDEC
viii. The failure was due to other causes not attributable to IDEC (including cases of force majeure such as natural disasters and other disasters)
Furthermore, the warranty described here refers to a warranty on the IDEC product as a unit, and damages induced by the failure of an IDEC product are excluded from this warranty.

## 5. Limitation of liability

The warranty listed in this Agreement is the full and complete warranty for IDEC products, and IDEC shall bear no liability whatsoever regarding special damages, indirect damages, incidental damages, or passive damages that occurred due to an IDEC product.

## 6. Service scope

The prices of IDEC products do not include the cost of services, such as dispatching technicians. Therefore, separate fees are required in the following cases.
(1) Instructions for installation / adjustment and accompaniment at test operation (including creating application software and testing operation, etc.)
(2) Maintenance inspections, adjustments, and repairs
(3) Technical instructions and technical training
(4) Product tests or inspections specified by you

The above content assumes transactions and usage within your region. Please consult with an IDEC sales representative regarding transactions and usage outside of your region. Also, IDEC provides no guarantees whatsoever regarding IDEC products sold outside your region.
