

## Push-in fitting type resin check valve Check Valve Series For Low Operating Pressure

Low level  
ozone proof

- *Opening pressure : 5kPa*

Securing air flow at low pressure that the conventional check valve does not open.

- *Low level ozone proof*

HNBR and FKM for rubber parts.

- *Less noise generation compared to the conventional type.*

No spring incorporated.

- *Resin type valve for cost-saving and light-weighting*

An easy-to-understand video introduces the features of this check valve.
