RJ45 C-Bus™ Protection Device

C-Bus[™] RJ45 Surge Protection

Novaris C-BusTM RJ45 surge protection products are specifically designed for the protection of C-BusTM RJ45 communications wiring.

Communications and Remote Override Protection

The Novaris C-BusTM RJ45 network protector is designed with primary protection elements of the C-BusTM network pairs and secondary protection elements to provide protection for the Remote Override pairs.

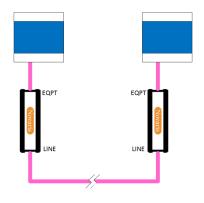

230V Earth Isolation

The Novaris C-BusTM protector contains integrated 230V isolation to prevent equipment damage during power to earth faults but also provide efficient earth bonding during a surge event.

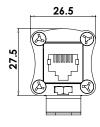

Simple Plug and Play Solution

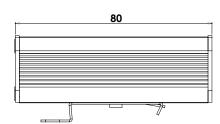

Simply plugging the Novaris C-Bus $^{\text{TM}}$ in line protectors at either end of a C-Bus $^{\text{TM}}$ communication network provides excellent protection for your control and management system.

Installation

Dimensions

C-Bus Wiring

Connection	Pin Number
Remote Override On	1
Remote Override On	2
C-Bus Negative (-)	3
C-Bus Positive (+)	4
C-Bus Negative (-)	5
C-Bus Positive (+)	6
Remote Override Off	7
Remote Override Off	8

Note: C-Bus is a registered trademark of Schneider Electric (Australia) Pty Ltd.
