

## Sensor head, Separate display type Pressure sensor Small Pressure Sensor 11・12- series

### Sensor head (11, 12 series)

- "Union", "Nipple", and "Male screw" types are available.
- Use of an analog output type and display (SED-31 series) has made a separate display system possible.
  - Small pressure sensor 11-series  
(Width: 10mm, Height: 10mm, Length: 24.5mm)
- 6 types for 11-series. "Positive", "Negative" and "Compound" pressure type for pressure range. Switch output and analog output type for output spec.
- 12-series is newly added. Easier wiring and maintenance with connector type lead wire.
  - Small pressure sensor of Width : 8.5mm × Height : 10mm × Length : 25.4mm
  - 5 types of lead wire length are available.  
500mm, 1000mm, 2000mm, 3000mm and 5000mm, according to your installation site.
  - 12-series handles negative pressure only.
- 2 types of output spec., Switch output and Analog output, are available.
- Hot** Option for copper alloy free material and against low ozone concentration on the air flow path.  
Metal parts material is non-copper metals. HNBR for seal rubber material.
