

1. Vacuum Release Unit

This unit adjusts the vacuum release air retaining vacuum generators' vacuum characteristics as they are.

- Fluid medium: Air
- Operating pressure range: 0~0.7MPa
- Relief valve activation pressure setting range: -0.015~0.015MPa
- Operating vacuum pressure: 0~-101kPa
- Operating temp. range: 0~60°C(No freezing)
- Resin: PBT
- Metal: Brass with electroless nickel plating
- Seal rubber: NBR
